Every [N] above is a number Toggle has not standardized. Set it in the JSON under "amounts", or fix the brain service file if the number is the same for every client.

Before you send

- Check the key dates against the timeline in the proposal you sent them.
- Check the service list against the quotation, line by line.
- Confirm the names, titles and emails in section 2 are current.
- Delete this page.

Notes from the draft

- This is the reference copy built from example-input.json. It is not a client document.
- Copy this file, fill the bracketed fields, delete the services the client did not buy, then rebuild.

1. How to read this document.

This document sets out the work Toggle will do for [CLIENT], how much of it, and when each piece is due. It follows the proposal and the quotation you have already seen, and turns them into dates both of us can hold each other to.

Section 3 lists your key dates in one place. Section 5 breaks the work down by service, and each service names what is not included. Read those two sections and you have the whole agreement.

This document does not carry any prices. Quotation [QUOTATION NUMBER], dated [DATE THE QUOTE WAS SENT], is where the fees live. If the two documents ever disagree on what you are buying, the quotation decides.

If you expected something that is not written here, tell your account lead before you sign. We would rather fix it now than argue about it in month three.

2. What you bought.
