ICMS

Media Plan Proposal

TikTok · Meta · Google Search | Three budget scenarios | 22 August 2026

What we found before writing this plan

We audited the live Google Ads account and read the page source on icms.edu.my before proposing a single ringgit of spend. These are the numbers as they stand today.

RM3,137

Spent in 30 days

Google Search only, 23 July to 21 August 2026.

0

Leads recorded

The account reports zero conversions for that spend.

1 of 8

Programmes advertised

Only Enforcement Management runs.
Football Studies is blocked by a negative keyword.

0

Sitelinks in the account

No sitelinks, no call asset, no WhatsApp route anywhere on the site.

The cause is one missing line of code. The Google Ads tag loads on every page and never fires a conversion event. The enquiry form submits without leaving the page and no thank you page exists, so a form submission is never reportable. The only thing the tag can report is a page view, which is why one auto created action counted 732 "conversions" while all three lead form actions counted zero.

Two weeks of measurement before any scale

The category default when a college is short of students is ~~spend more on ads~~ fix the meter, then spend. Every plan in this document begins the same way, and none of them bills you for media you cannot measure.

WEEK 1

Make the meter work

- Bind a Google Ads conversion event to the form success event, site wide
- Add a thank you page so GA4 and Meta can read the same signal
- Delete the three broken conversion actions and the page view action
- Demote Business Profile taps out of bidding

WEEK 2

Make the click land somewhere

- Repair the Apply Now link, which has pointed at a February 2026 seminar page for six months
- Build one Malay landing page per priority programme, form above the fold
- Add a WhatsApp click to chat route
- Agree one intake calendar, since the site and the ads currently give five answers

WEEK 3 ONWARD

Then media scales

- Full budget goes live only once a test lead has been recorded end to end
- Week 6 read out against the CPL ceilings printed in this document
- Any channel over its ceiling by 50 percent gets paused, not defended

Weeks 1 and 2 run at 25 percent of the chosen budget.

If we cannot show you a lead in the platform by the end of week 2, we do not scale the spend and you do not pay for the media you did not use.

The order we sell your programmes in

ICMS management named the focus programmes for this year. This is the sequence we fund them in, and the reason for each position.

Football & Sports Studies

Diploma in Football Studies · Sports Science · Exercise Science

First
funded

- ICMS states it is the only college in Southeast Asia offering the Football Studies diploma
- Your own reported cost per lead on Meta is RM2.13, roughly a third of every other programme
- Nobody is bidding these terms on Google Search today
- Currently blocked in your account by a paused keyword and a live negative

Enforcement & Policing

Diploma in Enforcement Management · Policing & Investigation · Bachelor in Law Enforcement

Second
funded

- The only programme running today, with a proven 9.97 percent click through rate
- Your reported cost per lead on Meta is RM7.00
- One keyword, law enforcement course malaysia, produced the only leads the account has recorded
- Direct competitive pressure from a cooperative college with a far larger campus

Business, Technology & Postgraduate

Business Administration · Computer Science · Applied AI · MBA · Master in Management · DBA

Third
funded

- Higher fee value per student, longer consideration cycle
- Postgraduate search demand is small but cheap to own
- Funded from the RM12,000 plan upward, not before
- Computer Science and Applied AI wait until the lab upgrade lands

We do not fund all nine programmes at once. Two students per programme is an operating cost problem, not a marketing win.

Three platforms, three different jobs

Google Search is the smallest line in every plan, and that is deliberate. Search captures demand that already exists. TikTok and Meta create it.

Meta Facebook & Instagram

Job: reliable lead volume at a known cost, plus retargeting everyone the other two channels touch.

- Instant lead forms with qualifying questions, plus click to WhatsApp
- The only channel where ICMS already has first party cost per lead data
- Carries the largest share at every budget level

Lead forms

Click to WhatsApp

Retargeting

TikTok

Job: reach SPM leavers and football prospects who are not searching yet, and fix the brand problem while doing it.

- Where the 17 to 22 audience actually spends its attention
- Football and campus content is native to the platform, not adapted to it
- Doubles as the branding fix management asked for, at media cost

Spark Ads

Instant Forms

Creator content

Google Search

Job: capture the person already typing your programme name, defend your brand, and take Unikop comparison traffic.

- Highest intent and highest close rate of the three
- Also the most expensive per lead, at roughly RM3.96 per click today
- Volume is capped by how many Malaysians search these terms, so a larger budget here buys the same generic queries that already failed

Brand

Programme

Competitor

Search is capped on purpose. The account has produced 10,996 impressions in 30 days across 80 keywords, so the honest ceiling on Google is real and we have priced to it.

Three plans, side by side

All figures are monthly media spend. Lead counts are the literal sum of the per channel arithmetic on slides 7 to 9. Enrolment ranges apply the 2 to 3 percent lead to enrolment rate ICMS reported.

Monthly media	Meta	TikTok	Google Search	Leads / month	Blended CPL	Enrolments / month	Cost per enrolment
Plan A · RM6,000	RM2,400	RM2,400	RM1,200	727	RM8.25	15 to 22	RM273 to RM400
Plan B · RM12,000	RM4,800	RM4,200	RM3,000	966	RM12.42	19 to 29	RM414 to RM632
Plan C · RM20,000	RM8,000	RM6,000	RM6,000	1,180	RM16.95	24 to 35	RM571 to RM833

Why the cost per lead rises as budget grows

Your RM2.13 football lead came from roughly RM100 a day. At ten times that spend the same audience sees the ad more often, frequency climbs, and the auction charges more for the next thousand people. We have priced that in rather than quoting your best day back to you.

What stays the same in all three

The two week measurement gate, the CPL ceiling per channel, the weekly search term and creative review, and the kill rule. The plans differ in how many programmes they can carry and how fast they reach your enrolment target, not in how carefully they are run.

Plan A · Prove the channel

RM6,000 / month

Two programmes only. This plan exists to prove the cost per lead on real tracking before ICMS commits a larger budget.

Meta RM2,400 TikTok RM2,400 Google Search RM1,200

Channel	Monthly	CPL ceiling	Leads
Meta · Football	RM1,000	RM8	125
Meta · Enforcement	RM1,000	RM8	125
Meta · Retargeting	RM400	RM8	50
TikTok · Football	RM1,400	RM6	233
TikTok · Enforcement	RM1,000	RM6	167
Google · Brand	RM240	RM44	5
Google · Enforcement	RM480	RM44	11
Google · Football	RM480	RM44	11
Total	RM6,000	RM8.25	727

727

Leads per month

Sum of the eight lines at left.

15 to 22

Enrolments per month

At your reported 2 to 3 percent close rate.

What this plan does not cover

- Business Administration, Computer Science and Applied AI stay unfunded
- No postgraduate campaigns, so MBA and Master in Management run on organic only
- No competitor conquest against Unikop
- No international layer, so the Bangladesh, Pakistan and China pipeline stays with your agents
- At 180 to 264 enrolments a year, this plan does not reach the 300 target on its own

Plan B · Build the machine

RM12,000 / month

Adds Business Administration, a brand defense campaign, and the first competitor conquest against Unikop.

Meta RM4,800 TikTok RM4,200 Google Search RM3,000

Channel	Monthly	CPL ceiling	Leads
Meta · Football	RM1,700	RM11	155
Meta · Enforcement	RM1,500	RM11	136
Meta · Business Admin	RM800	RM11	73
Meta · Retargeting	RM800	RM11	72
TikTok · Football	RM2,000	RM9	222
TikTok · Enforcement	RM1,400	RM9	156
TikTok · Business Admin	RM800	RM9	89
Google · Brand	RM450	RM48	9
Google · Enforcement & Policing	RM900	RM48	19
Google · Football & Sports	RM900	RM48	19
Google · Business Admin	RM450	RM48	9
Google · Competitor	RM300	RM48	7
Total	RM12,000	RM12.42	966

966

Leads per month

Sum of the twelve lines at left.

19 to 29

Enrolments per month

At your reported 2 to 3 percent close rate.

What RM12,000 adds over RM6,000

- Business Administration funded on all three platforms
- A dedicated brand campaign, so you stop paying RM4.69 a click for your own name
- Competitor conquest on Unikop, Unicom, SEGI and UNITAR comparison terms
- Enough Meta budget to run a real retargeting pool rather than a token one

At 228 to 348 enrolments a year, this plan reaches 300 only if the close rate holds near 3 percent.

Plan C · Scale to target

RM20,000 / month

Carries every focus programme including postgraduate, and adds the international layer your agent network is currently carrying alone.

Meta 40%

TikTok 30%

Google Search 30%

■ Meta RM8,000 ■ TikTok RM6,000 ■ Google Search RM6,000

Channel	Monthly	CPL ceiling	Leads
Meta · Football	RM2,400	RM14	171
Meta · Enforcement	RM2,000	RM14	143
Meta · Business Admin	RM1,200	RM14	86
Meta · Postgraduate	RM1,200	RM14	86
Meta · Retargeting	RM1,200	RM14	85
TikTok · Football	RM2,400	RM12	200
TikTok · Enforcement	RM1,600	RM12	133
TikTok · Business Admin	RM1,000	RM12	83
TikTok · Campus & brand	RM1,000	RM12	84
Google · Brand	RM600	RM55	11
Google · Enforcement & Policing	RM1,400	RM55	25
Google · Football & Sports	RM1,400	RM55	25
Google · Business & Technology	RM900	RM55	17
Google · Postgraduate	RM1,000	RM55	18
Google · Competitor	RM700	RM55	13
Total	RM20,000	RM16.95	1,180

1,180

Leads per month

Sum of the fifteen lines at left.

24 to 35

Enrolments per month

At your reported 2 to 3 percent close rate.

What RM20,000 adds over RM12,000

- Postgraduate funded on Meta and Google, covering MBA, Master in Management and the DBA
- A campus and brand track on TikTok, which is the branding repair management asked for, paid for as media
- Computer Science and Applied AI enter the Google mix
- Headroom to run an international test into Bangladesh, Pakistan and the Gulf without cutting local budget

At 288 to 420 enrolments a year, this is the only plan that clears 300 across most of its range.

Which plan reaches 600 students

ICMS is targeting roughly 600 enrolments this calendar year, with about 150 already closed and international agents covering a further share. That leaves roughly 300 for marketing to deliver.

Plan	Monthly media	Enrolments / month	Enrolments / year	Annual media	Media per enrolment	Reaches 300?
Plan A	RM6,000	15 to 22	180 to 264	RM72,000	RM273 to RM400	No. Falls short at both ends of the range.
Plan B	RM12,000	19 to 29	228 to 348	RM144,000	RM414 to RM632	Only if the close rate holds near 3 percent.
Plan C	RM20,000	24 to 35	288 to 420	RM240,000	RM571 to RM833	Yes, across most of the range.

4%

Media cost as a share of one student's fees

Worst case in the most expensive plan: RM833 of media against a diploma listed near the RM21,000 PTPTN cap.

The lever that beats budget

Moving the lead to enrolment rate from 2 percent to 4 percent halves the media required for the same 300 students. A CRM, a written response time and a WhatsApp route are worth more than any bid adjustment in this document. We have listed them on slide 14 as asks, not as billable scope.

What would make these numbers wrong

- Tracking not fixed, in which case none of it is measurable
- Close rate below 2 percent, which we will see by week 6
- Search volume thinner than the account suggests
- Sales capacity below 30 calls a day at Plan C volume

Where every cost per lead in this plan comes from

Three of these numbers are yours, one is a benchmark, and one is arithmetic off your own click cost. None of them is a round number we liked the look of.

Channel	What ICMS reports today	Toggle planning CPL	Why we planned higher
Meta · Football	RM2.13 per lead	RM8 to RM14	That figure came from roughly RM100 a day. At Plan C the same audience sees the ad far more often, and the auction charges more for each additional thousand people reached.
Meta · Enforcement	RM7.00 per lead	RM8 to RM14	Closest to a scalable figure of the three you reported. We hold it as the floor and plan above it.
Meta · International	RM19.00 per lead	Plan C only	Kept out of the local blended figure so it cannot flatter the Malaysian numbers.
TikTok	Not running	RM6 to RM12	No first party data exists for ICMS on TikTok. This is a Malaysian education category benchmark and it is the single assumption in this document we most want to replace with your own data by week 6.
Google Search	No measurable leads	RM44 to RM55	Your current average cost per click is RM3.96. At a 9 percent landing page conversion rate that is RM44 a lead. Today the page converts at zero because it is a contact page with the form below the fold.

Every CPL above is a ceiling, not a forecast. If a channel runs 50 percent over its ceiling for two consecutive weeks, we pause it and move the budget rather than defend it in a report.

The message we lead with

Your current ads promise affordable fees, PTPTN and online study. Your website publishes no fee, never mentions PTPTN on the programme page, and lists no online mode. We fix the claim before we buy the click.

THE POSITIONING

Register for RM300, not RM1,900. The only Football Studies diploma in Southeast Asia, and a monthly intake that does not make you wait for next year.

Every clause is checkable. The registration fee is a fact ICMS already owns and currently publishes nowhere. The Football Studies claim is ICMS's own, stated on the homepage. The intake cadence needs one decision from management before it goes live.

TikTok

- Titans FC training and match footage, shot vertical on a phone, not repurposed from Facebook
- Student voice, one programme per video, Malay first with code switching
- Spark Ads on the strongest organic posts before paying for cold creative
- Six new hooks a month, tested against a 1 percent click through kill rule

Meta

- Instant forms with a programme question and a financing question, so sales gets a qualified lead
- Click to WhatsApp as a parallel route for prospects who will not fill a form
- Carousel on career outcomes, which is the objection that actually blocks enrolment
- Retargeting split by programme page visited

Google Search

- Two responsive search ads per ad group instead of the current one
- Six sitelinks, four callouts, structured snippets and a call asset per campaign
- Malay landing pages for Malay queries, which the account does not have today
- The RM300 registration fee in a headline, since no competitor can copy it

How you will know it is working

Reporting is a cadence, not a monthly PDF. These are the numbers we hold ourselves to and the days you see them.

Weekly

Search terms and creative

Negative keywords added, losing creative paused, budget shifted between programmes.

Week 6

First full read out

Actual cost per lead per channel against every ceiling printed on slide 11.

Monthly

Lead to enrolment

The only number that decides whether the media budget is right. Requires ICMS to report closes back to us.

Quarterly

Programme mix review

Which programmes earn their budget, which get cut, which get added.

The kill rules, printed before launch

- Any channel 50 percent over its CPL ceiling for two consecutive weeks gets paused
- Any ad below 1 percent click through rate after 5,000 impressions gets replaced
- Any programme below half the account average close rate loses its budget at the quarterly review

What we will not report

Impressions as a headline, optimisation score, and any conversion count that includes a page view or a Business Profile directions tap. Your account currently reports 732 of those a month as conversions. We will not put that number in a report and call it performance.

What we need from ICMS

Six items. The first three unblock the media. The last three are worth more than the media, and none of them is billable scope.

1 Admin access

Standard or Admin on Google Ads, plus Meta Business Manager and a TikTok Business Center. We currently hold reports only access, granted 18 August, which means we cannot change a single setting.

2 Half a day of developer time

To bind the conversion event to the form success event and add a thank you page. Without this every number in this document is unmeasurable.

3 One intake calendar

Your programme pages say January, May and September. Your Apply Now page sells a March 2026 intake. Your ads say July and August. Management says monthly. We need one answer before any ad goes live.

4 Permission to publish fees

The RM300 registration fee against Unikop's RM1,900 is the strongest checkable claim ICMS owns, and it appears nowhere on the site or in any ad.

5 A lead owner and a response time

Leads currently land in a shared spreadsheet with no CRM and no response SOP. At Plan C volume that is roughly 40 leads a day. Name an owner and commit to a first contact time.

6 A WhatsApp Business number

Your own team said prospects click WhatsApp and abandon forms. There is no WhatsApp link anywhere on icms.edu.my today. This is the cheapest conversion rate gain available to you.

Commercials

Media is paid to the platforms and billed at cost. The management fee is separate and covers strategy, build, creative, optimisation and reporting.

Line	Plan A	Plan B	Plan C	Notes
Media, paid to platforms	RM6,000	RM12,000	RM20,000	Billed at cost. Platform invoices shared in full every month.
Toggle management fee	RM (to be confirmed)	RM (to be confirmed)	RM (to be confirmed)	To be confirmed by Toggle before issue.
Months 1 and 2 media	RM1,500	RM3,000	RM5,000	Measurement gate runs at 25 percent of budget. You are not billed for media you cannot measure.
Minimum term	3 months	3 months	6 months	The week 6 read out only means something with a month 3 behind it.

Included in the management fee

- Account rebuild across all three platforms, including the Google Ads structure teardown
- Conversion tracking specification and verification, working with your developer
- Creative direction and copy for all three platforms, in Malay and English
- Weekly optimisation, monthly reporting, quarterly programme mix review

Quoted separately, not assumed

- Website rebuild, which the evidence in this document supports but which is not media scope
- Video and photo production on campus
- CRM selection and implementation
- SEO, which we have deliberately kept out of a media plan

Thank you

Fix the meter, unblock football, repair the Apply Now link. Those three cost almost nothing and address more of the problem than any budget decision in this document.
